# OUR DIFFERENCE IS OUR PEOPLE

## Program & Project Management

Our experience encompasses the full range of Program and Project Management activities across all phases of the Capability Life Cycle utilising contemporary methodologies.

Our people have specific experience introducing and integrating new capabilities into service.

## Engineering

AeroPM has established strong expertise in Aerospace Engineering, Avionics Engineering, Systems Engineering, Software Engineering and Engineering Management through provision of current and recent professional services within complex and dynamic strategic CASG programs.

## Test and Evaluation (T&E)

AeroPM has established strong expertise in Test and Evaluation across Air, Land, Maritime and Joint domains encompassing the full range of independent Verification and Validation throughout the Capability Life Cycle. We possess practical experience leading multifaceted T&E programs.

## Integrated Logistics Support (ILS)

Our capabilities encompass the full range of ILS for the support system across all Fundamental Input to Capability and Capability Life Cycle Phases including the complete spectrum of planning and execution from determination of support system needs through to execution.

## Procurement and Contracting

AeroPM personnel have extensive experience and proficiency in solicitation including preparation of detailed tenders, tender evaluations, provision of recommendations, professional contract negotiations, and developing solicitation artefacts including Request for Tender packs.

## Certification

AeroPM personnel have extensive experience as Project Engineering Managers (PEMs) within recent and current acquisition programs. Our experience includes development of ASAMPs and CPPs through to verification activities and development of Accomplishment Summaries.

## Capability Definition

Our team has wide-ranging experience with development of Capability Definition Document (CDD) suites including Operational Concept Documents (OCD), Function and Performance Specifications (FPS), and Test and Evaluation Master Plans (TEMP).

## FIC & Stakeholder Coordination

AeroPM proudly employs Australian Veterans with strong operational experience, knowledge and networks within the ADF. We have significant experience working within the Capability Life Cycle, Capability Transition and FIC integration across many current and emerging ADF platforms.
