Introduction Into Service

### OUR BACKGROUND

Established in 2014, AeroPM Pty Ltd is a consulting firm that engages across the private, government and military sectors. Based in Canberra, the company works with its clients Australia-wide to deliver a range of complex technical projects. AeroPM personnel are highly qualified and customer focussed authentic leaders, trained to perform in complex strategic environments.

### OUR CAPABILITY

AeroPM has established strong expertise in the specialised Integrated Logistics Support (ILS) discipline across the Air, Maritime, Land and Joint domains. Our capabilities encompass the full range of ILS across the ‘Support System’ Capabilities to support the Fundamental Inputs to Capability across all Capability Life Cycle stages. This includes the complete spectrum of ILS planning and execution, ranging from determination of high-level ‘Support System’ needs and requirements for the Capability Definition Documents, ILS Concept (ILSC) development, through to ILS program planning and execution. Our ILS specialists possess extensive practical experience with leading and managing ILS programs for up to ACAT I projects through pre-Government Approval, Transition of Support Responsibility and Introduction Into Service (IIS).

AeroPM ILS specialists have been responsible for the development and review of critical ILS documentation for acquisition projects. This includes ILS Concepts and Plans, ILS Instructions, Training Implementation Plans, Transition of Support Responsibility Plans, and IIS Plans. Our ILS specialists also have substantial experience providing SME advice on logistics and support requirements along with participating in Request for Tender (RFT) development, evaluation, and negotiation across the full ASDEFCON suite (Complex, Strategic and Support).

AeroPM ILS specialists are ex-military and public service personnel, with significant knowledge on current policies governing the ILS application in Defence. Our ILS specialists have extensive experience managing the delivery of Prime Contractor ILS programs during the requirements definition, design, verification and validation, and delivery stages. This includes primary responsibility for all ILS mandated system reviews, review and approval of ILS data items, and development of the performance management frameworks to support a contract. Our ILS specialists have been responsible for the review, validation and acceptance of Prime Contractor Logistics Support Analysis deliverables including spares modelling, Failure Modes and Effects Criticality Analysis, Reliability Centred Maintenance Reports, Level Of Repair Analysis Reports, Task Analysis Reports and Life Cycle Cost Models.

AeroPM ILS specialists have helped plan and deliver a number of Defence Capability Acquisitions and Sustainment. This includes AIR 6000 *Joint Strike Fighter*, AIR 6500 *Joint Battle Management System*, LAND 2072 Phase 2B *Integrated Battlespace Telecommunications Network*, JP 2072 Phase 2A *Tactical Communications Network*, LAND 154 *Counter Improvised Explosive Device (IED) Capabilities* and Maritime Command and Communications SPO (MC2SPO).
